# The Journey Of KRISHNA CHEMICALS

Since 2008

Krishna Chemicals was established in the year 2008 under the stewardship of Surendar Agarwal. His vision for quality Surface Coatings along with his ambition, commitment & hardwork towards his vision has made the Brands Goodshine & Krista well established names in the market today.

An ISO 9001:2015 certified company Krishna Chemicals is a leading manufacturer, wholesaler and exporter of PU Wood Coatings, Polyester Coatings, Stains, PU Metal Coatings, PU Glass Coatings, Melamine, NC, Wood Filler and more.

From a humble beginning in 2008 the journey of Krishna Chemicals has been long but a rewarding one. Initially catering to just the Kirti Nagar Furniture Market from a small establishment in Delhi to a Sixty Thousand Sq. Ft. production facility with close to 75 employees in, Sonipat, the industrial city of Haryana, it produces over 200 different products today. Going forward to fulfill the growing demand of the customers the factory will soon have a new address with state of the art production facility, latest technology and machines, fully equipped with a world class Quality Testing and R&D center in a 5000 Sq. Yard area.

All Krista & Goodshine products are manufactured under strict quality checks at all production stages using the best and superior compounds procured from the most trust worthy vendors of the industry. Our professionally managed production lines manned by highly qualified, skilled and trained production staff ensure that products manufactured are in compliance with the universally accepted norms of quality.

Krista & Goodshine products are currently available in over 20 states & UT's across India. A network of over 600 plus distributors & direct dealers besides retailers ensure that the products are available at all leading counters. A well trained sales team of over 50 people ensures that customers are serviced efficiently and effectively in line with one of our core value "CUSTOMER" the key to Krishna Chemicals' success.

# PU BASE COATS

Krista PU Base Coats are used as a protective layer for various surfaces, acting as a foundation for subsequent coatings. PU base coats offer excellent adhesion & abrasion resistance. They are often used for their ability to enhance the longevity and appearance of surfaces.

MIXING RATIO (MATT) – BASE : HARDENER :: 2:1

TO BE USED WITH RECOMMENDED THINNER – THINNING 30% - 40%

# MULTI-PURPOSE PU FINISH

Krista Multi-Purpose PU coatings are versatile protective and decorative finishes that can be used on various surfaces, including metal, wood, and plastics. They offer durability, resistance to chemicals and abrasion. It gives excellent Durability for interior and exterior substrate when applied as per recommended procedure on Aluminium , G.I. , M.S. , S.S. , Tin , Brass , Copper , Glass , Electroplated Surfaces , Wood , MDF & Plastic

# EPOXY FOR WOOD

Our Epoxy Insulator is a high-adhesion, two-component epoxy designed specifically for wooden substrates. It forms an impermeable barrier that blocks natural oils, resins, and moisture from rising to the surface, ensuring maximum adhesion and longevity of subsequent topcoats such as PU, Melamine, or Polyester. Ideal for both decorative and industrial wood finishes, this insulator helps stabilize the wood, minimizes warping, and prevents coating failures like blushing, peeling, or discoloration.

## EPOXY INSULATOR

MIXING RATIO (BASE COAT) – BASE : ACCELERATOR : CATALISER :: 100:2:2  
TO BE USED WITH RECOMMENDED THINNER – THINNING 30% - 40%

# ACRYLICS

Our Acrylic Coating range is designed to deliver outstanding performance. These coatings offer excellent UV resistance, color retention, and fast drying times, making them ideal for both interior and exterior applications. Formulated with high-quality acrylic resins, our coatings provide a tough, flexible film that resists cracking, peeling, and weathering – ensuring long-term surface protection and visual appeal.
